

Title-Only Messaging™

No Name? No Problem! Expand your reach, improve your list data and expand your results with Title-Only Messaging

Overview

- **Make voice contact without a name** – Use your list and reach the right person based on the job titles you designate. Our live call agents connect with company receptionists to make voice contact with the correct title holder.
- **Add new data to your list** – In addition to making voice contact, by actively engaging each account on your list to verify the title's accuracy as well as collecting phonetic contact names where possible, Boxpilot's live call agents generate two new valuable data points which can then be utilized or further verified.

Features

- **Verified by call center agent** – Boxpilot's live call center agents interact with company receptionists and PA's to direct messages and make voice contact with the correct person; this is not a computer dialed service.
- **Customizable to industry, seniority** – Live agents can make decisions to match title groups to companies depending on industry and company size.
- **Salutation solved** – Unlike email or direct mail, with title-only salutation, a well scripted voicemail or live contact will not draw attention to the missing name.
- **Integrates with other Boxpilot services** – Used with both voicemail and live message, integrates into Multi-wave, and Quick Lead Qualify programs, and optional LinkedIn name verification.
